

**Zucchini is a summer squash, just like yellow squash and crookneck squash. Zucchini is easy to grow in home gardens! They should be planted in the late spring since they will die if it gets below freezing. Zucchini is a fast growing plant, it can grow one to two inches per day! If you want the best tasting zucchini you should harvest the fruit when it is 6-8 inches long. (Zucchini is a fruit. Not only does it have and come from seeds, it grows on the flowering part of the zucchini plant.) In Georgia the harvest season for zucchini is from May to October.**
