

## GO POLLINATE

*(Print two sets of cards. If you can see through the paper glue the cards on construction paper or print on card stock paper.)*

Go Pollinate is a card game where 5 cards are dealt to each player (a group of 2, 3 or 4 people). The remaining cards are shuffled and then placed face down between the players. Players hold their cards so they are able to see them, but no one else can.

Before starting the game, all of the players put any pairs they happen to have in their hand down and earn a point for each pair. Starting with the youngest player and moving clockwise, the player asks one of their opponents "Do you have a \_\_\_" The card requested should be one the player has in their hand.

If the opponent has the card, they must give it to the player who earns a point for making a match. If the opponent does not have the card they say "Go Pollinate!"

The player must then pick a single card from the faced down pile of cards. If they make a pair, they place it down and earn a point.

If a player runs out of cards, they pick five from the faced down pile of cards.

**The game is won one of three ways (depending on how you wish to play):**

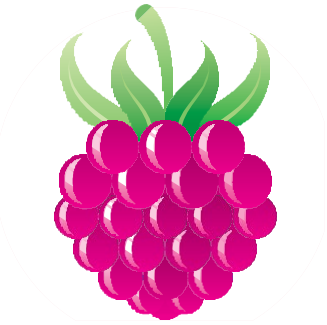

- 1. By the person with the most points when all the cards are gone, or**
- 2. By the person who gets 5 points first, or**
- 3. By the person with the most points at the end of a set time limit**

## POLLINATE MEMORY GAME

1. Deal out several pairs of cards face down on the table. (The amount of pairs will be determined by the age of your child.)
2. Players take turns to flip over 2 cards. If they flip over a pair that matches, they win the pair and get to have another go. If not, the next player takes a turn.
3. At the end, the player with the most cards wins.
