## BUTTER RECIPE

### Ingredients/Supplies

- 1 pint room temperature heavy whipping cream
- 1/8 tsp. salt
- 2-3 marbles (optional)
- Container with a secure lid

### Directions

1. Put the marbles in the jar and then fill the jar half full of heavy whipping cream.
2. Secure the lid and begin shaking the jar for 8-10 minutes.
3. About halfway through you'll begin to hear a difference in the shaking sound. This is the beginning of the butter and the buttermilk separating. Add salt, put the lid back on and keep shaking.
4. When you see a solid mass in the jar you can quit shaking because you have butter!
5. Use a strainer to separate the butter from the buttermilk and transfer it to its own container.
6. Enjoy your freshly made butter.
