

PEEPS CATAPULT CHALLENGE

Supplies

Paper Towel or Toiler Paper Tube

Ruler or something similar

Masking Tape

Plastic Spoon

Marshmallow Peep or something similar in size and weight

3 large containers or bins with points assigned to them (example, 5, 10, 15)

Directions

Tape the plastic spoon to one end of your ruler so the bowl part of the spoon is at the very end of the ruler, so it is perpendicular to each other.

How To Launch Your Peep

Go outside and find a level place to launch your peep. Place your containers with points assigned in a line. You can either tape your tube down or hold in with your hand so it is stable. Put the spoon end of the ruler down and load your peep into the bowl of the spoon. Then push down quickly and firmly on the other end of the ruler and aim their peep toward the container. Then watch that peep fly and record how many points you get!
